

What is the white list

of VAT taxpayers?

Recent changes in Polish law regulations **obliged companies to verify their business partners** by checking VAT ID status and the correctness of bank account number.

It's crucial **to automatize process** and provide non disruptive solution for vendor and customer verification.

Failure to comply with the Ministry's requirements after 1 January 2020 may result in severe penalties:

- ! Joint and several liability with all the assets together with the counterparty for their tax debts in the proportion to that supply of goods or services.
- ! Inability to classify expenses as tax deductible costs.

Our White List solution in SAP system:

Integration with your SAP processes

Compliance with the ministerial obligations

Helpful query history

Always up to date

Why Apollonic White List solution?

You can verify customer and supplier master data and keep it coherent with the White List database. The solution allows you to send requests to the White List as part of your **business processes** so that they remain uninterrupted.

Complete verification history is available in SAP. It allows the responsible person **to resolve discrepancies on a daily basis**. In case of an audit, it may be proof of due diligence in the area of taxpayers' verification.
